VORLÄUFIGES VORWORT.

Für diese erste kritische ausgabe von Ælfrics Grammatik und Glossar sind die folgenden handschriften benützt worden:

A = hs. von All Souls' College zu Oxford;
C = hs. von Corpus Christi College zu Cambridge;
D = hs. der Cathedral Library zu Durham;
F = hs. der Cottonschen sammlung, Faustina;
H = hs. der Harleyschen sammlung;
h = eine zweite hs. derselben sammlung;
J = eine zweite hs. der Cottonschen sammlung, Julius;
O = hs. von St. John's College zu Oxford;
P = Pariser hs.;
R = ein codex regius des Brit. Museums;
r = ein zweiter codex regius;
S = hs. zu Sigmaringen;
T = hs. von Trinity College zu Cambridge;
U = hs. der University Library zu Cambridge;
W = hs. der Cathedral Library zu Worcester.

Ich habe es unterlassen die schreibung zu normalisieren: im allgemeinen bin ich in dieser *O* gefolgt. fehler der hs., aus welcher die erhaltenen geflossen sind, habe ich dann unverbessert gelassen, wenn mir die möglichkeit nicht ausgeschlossen schien, dass sich Ælfric selbst geirrt haben könnte. selbstverständlich werden alle diese fälle in den anmerkungen zur sprache kommen. ich füge hier nur noch hinzu, dass bei den varianten eine runde klammer anzeigt, dass die betreffenden buchstaben oder wörter über der zeile nachgetragen worden sind; eine eckige dagegen, dass sie jetzt in der hs. nicht mehr vorhanden sind.

INCIPIT PRAEFATIO HVIVS LIBRI.

Ego Ælfricus, ut minus sapiens, has excerptiones de Prisciano minore uel maiore uobis pueruli tenellis ad uestram linguam transferre studui, quatinus perlectis octo partibus Donati in isto libello potestis utramque linguam, uidelicet latinam et anglicam, uestrae teneritudini inserere interim, usque quo ad perfectiora perueniatis studia. noui namque multos me reprehensuros, quod talibus studiis meum ingenium occupare uoluissem, scilicet grammaticam artem ad anglicam linguam uertendo. sed ego deputo hanc lectionem inscientibus pueruli, non senibus, aptandam fore. scio multimodis uerba posse interpretari, sed ego simplicem interpretationem sequor fastidii uitandi causa. si alicui tamen displicuerit, nostram interpretationem dicat, quomodo uult: nos contenti sumus, sicut didicimus in scolu Aðelwoldi, uenerabilis praesulis, qui multos ad bonum imbuit.
